The vehicle information and employee's name will be given to the tenant contact on a weekly basis by Property Management. It is expected that the tenant contact (or the appropriate company representative) will discuss the parking issue with the offender and motivate the offender to park inside the gated parking area. VI. EMERGENCY PROCEDURES

OVERVIEW

The Ownership and Management of Southwest Corporate Center take Fire and Life Safety very seriously. Our objective is to provide our tenants with a safe and comfortable working environment. With this in mind, this Emergency Procedures Manual was developed.

While the Fire/Life Safety Systems in the building are engineered to ensure the safety of all occupants in the building in the event of a fire, it is important that all individuals working in the building understand the building's emergency procedures. However, each emergency is unique and sometimes the recommended procedures may not be suitable for all conditions that arise. Therefore, common sense should always be the primary element of any emergency procedure.

Please take the time to familiarize your entire staff with these procedures. If you have any questions regarding these procedures or any of the Fire & Life Safety systems in place in Southwest Corporate Center, please contact the Management Office at 713-777-8282.

EMERGENCY PHONE NUMBERS

Emergency:	911
Fire Department (dispatch):	713-884-3140
Police Department (non-emergency):	713-222-3131
Management Office:	713-777-8282
After-Hours Emergencies:	713-777-8282

FIRE

IF A FIRE IS DISCOVERED INSIDE YOUR SUITE

1. Advise others and move everyone away from the fire
2. Confine the fire by closing all doors in the area
3. Notify the Fire Department (911) and provide the following information:

OMNINET

Omninet Property Management, Inc.

- Building Name – Southwest Corporate Center
- Building Address – 9700 Bissonnet
- Nearest Cross Street – Southwest Freeway
- Suite Number or Exact Location of Fire
- Your call back number

NOTE: Do not hang up until the Emergency Operator does so.

4. Notify the Management Office at 713-777-8282
5. Attempt to extinguish the fire only under the following conditions:
 - If the fire is small and can easily be extinguished.
 - You are familiar with the operation of an extinguisher and it can be done safely.
 - You have someone with you.
 - You have your back facing an exit.
6. Proceed to the nearest exit to evacuate. Exit via stairwells; do not use the elevators.
7. Once outside the building, move to a safe refuge area away from the building and Fire Department operations.

NOTE: FIRES NEED FUEL, HEAT AND OXYGEN TO SURVIVE. YOU CAN REDUCE OR EXTINGUISH FIRE BY REMOVING ANY ONE OF THESE ELEMENTS. FOR EXAMPLE, CLOSE DOORS AND USE EXTINGUISHER TO REDUCE OXYGEN, THROW WATER ON THE FIRE TO REDUCE HEAT, AND ELIMINATE FUEL SOURCES BY REMOVING NEARBY PAPER, PLASTICS, AND OTHER FLAMMABLES.

IF A FIRE IS DISCOVERED OUTSIDE OF YOUR SUITE:

If you are in your suite, smoke or heat is evident in the corridor, and you are not able to exit, proceed as follows:

1. Call 911 and provide the following information:
 - Building Name – Southwest Corporate Center
 - Building Address – 9700 Bissonnet
 - Nearest Cross Street – Southwest Freeway
 - Suite Number or Exact Location of Fire
 - Your call back number

NOTE: Do not hang up until the Emergency Operator does so.

2. Call the Management Office at 713-777-8282

- Report your building number, floor and suite number.

3. FEEL THE DOOR. If it is hot or warm, DO NOT OPEN IT!

4. CLOSE AS MANY DOORS AS POSSIBLE BETWEEN YOU AND THE FIRE.

5. IF SMOKE ENTERS YOUR SUITE FROM BENEATH THE DOOR, seal the area with a fire blanket, wet towel or other mist material.

6. IF SMOKE IN YOUR SUITE BECOMES UNBEARABLE, break a window for additional oxygen.

7. IF YOUR TELEPHONE STOPS WORKING, display brightly colored material from the window. Wave it to make it more visible to rescuers.

8. DO NOT JUMP!

FIRE SAFETY REMINDERS

1. Post Emergency Phone Numbers for all employees.

2. Make sure all employees are aware of the location of fire extinguishers and are familiar with how an extinguisher operates.

3. In a fire or other emergency, follow the instruction of Emergency Personnel.

4. Never use the elevators.

5. If you encounter smoke, get down on your hands and knees. Air is cleaner and cooler near the floor. Crawl to the nearest stairwell and exit if it is safe to do so.

6. Few people are burned to death in fires. Most fire-related deaths are the result of smoke inhalation, poisonous gas or panic. Panic can be avoided by being well prepared for an emergency. Learn all the emergency procedures as if they were second nature.

FIRE PREVENTION TIPS

1. Replace any electrical cord that has cracked insulation or a broken connector.
2. Do not pinch electrical cords under or behind furniture.
3. Do not run electrical extension cords under chair mats or across doorways where they can be stepped on or chaffed.
4. Leave space for air to circulate around heaters and other heat-producing equipment such as copiers and computer terminals.
5. Turn off or unplug all appliances, including coffee makers and hot plates at the end of each workday.
6. Keep exits, storage areas and stairways free from waste paper, empty boxes, dirty rags and other fire hazards.
7. Know the locations of fire extinguishers in the building and your work area.
8. Remove trash on a regular basis.
9. Close all doors after working hours.
10. Discard all flammable liquids.
11. Observe the building's NO SMOKING policies. Never throw matches or cigarette butts into waste containers (inside or outside of building).

FIRE EXTINGUISHER LOCATION & BASIC OPERATION

Fire extinguishers are located throughout the building in common areas and tenant spaces.

All extinguishers in the buildings may be used on fires originating from wood, paper, plastic, grease, oil and electricity.

Operating A Fire Extinguisher:

- To open the cabinet, turn the handle and pull open.

- Remember the "P-A-S-S" method for effective fire extinguisher use:

P – Pull the safety pin. This is usually the pin with a string attached.

A – Aim the hose, nozzle or horn at the base of the fire.

S – Squeeze the trigger handle

S – Sweep from side to side and watch for the re-flash of the fire.

NOTE: ALWAYS MAINTAIN A THREE-FOOT CLEARANCE AREA AROUND FIRE EQUIPMENT. ONCE THE EQUIPMENT HAS BEEN USED, DO NOT TRY TO RE-HANG IT, EVEN FOR A FEW SECONDS. USED EXTINGUISHER'S SHOULD BE SERVICED IMMEDIATELY!

EARTHQUAKES

Earthquake Preparedness

While the office building is structurally designed to minimize earthquake damage, it is wise for all occupants to be well prepared as well as keenly aware of the earthquake emergency procedures.

The following **SUPPLIES** will be necessary to protect and sustain your employees in the event of an earthquake:

- ❑ **Food** – stock your office with non-perishable and easy-to-store food products such as dehydrated foods and food bars.
- ❑ **Water** – keep at least a three-day supply of purified water. It is recommended that you stock two quarts of water per day, per employee.
- ❑ **Emergency Lighting** – flashlights, flares, light sticks.
- ❑ **Batteries** – keep a fresh supply
- ❑ **Medical** – keep a well-stocked First Aid Kit. Choose kits designed to treat earthquake-related injuries such as heavy bleeding, shock and broken bones.
- ❑ **Blankets** – lightweight fire and shock retardant emergency blankets.
- ❑ **Radios** – portable transistor radios with extra batteries and two-way radios.
- ❑ **Fire Extinguisher**
- ❑ **Medications** – persons on medication should keep a 72-hour supply in their desk.

Additional Supplies to Consider

- ☐ Heavy work gloves
- ☐ Hard Hats & Goggles
- ☐ Work shoes
- ☐ Generator
- ☐ Shovels, crowbars
- ☐ Catalytic heater
- ☐ Dust masks
- ☐ Chemical toilets, waste bags, lime
- ☐ Water purification tablets
- ☐ Sleeping bags & Cots
- ☐ Portable stove
- ☐ Eating utensils
- ☐ Instant ice pack
- ☐ Pre-moistened towelettes

During An Earthquake

While Earthquake Emergency Procedures are similar to those of a fire, one specific difference should be communicated to all building occupants: Evacuation during fire is highly probable, whereas **EVACUATION DURING AN EARTHQUAKE IS NOT PROBABLE.**

Please adhere to the following safety procedures during an earthquake:

1. Take shelter away from windows and seek protection under tables, desks, or other objects that offer shelter from flying glass and debris.
2. Do not leave the sheltered area or exit the building until the quake is over. Seek safety where you are and leave calmly afterward if evacuation is necessary.
3. Do not dash for exits – stairwells may be unsafe.
4. Never attempt to use elevators during an earthquake. Afterwards, do not use elevators until they are checked for safety.
5. Stay clear of bookcases, file cabinets, windows and other heavy objects.
6. Turn off electrical equipment. Do not be surprised if electricity goes off or alarm systems are activated.
7. Do not smoke or use matches in case of gas leaks. If power fails, use battery operated lights.

OMNINET

Omninet Property Management, Inc.

If You Are Outside of the Building When An Earthquake Occurs

1. Move away from buildings, utility wires and poles, debris and areas subject to falling glass.
2. If you are unable to reach a clear area, stand in a doorway or archway.
3. If threatened by falling debris, cover face with one forearm and the back of the head with the other.
4. The most dangerous place to be is on a sidewalk subject to falling debris such as glass and masonry.

After an Earthquake

1. Check for injured persons. DO NOT attempt to move a seriously injured person unless they are in immediate danger.
2. DO NOT use matches, candles or other open flames.
3. DO NOT turn on electrical switches or appliances.
4. Inspect your area for damage. Check for fire. Check utilities for gas and water leaks or electrical shorts. Stay clear of wires that are shorting out.
5. If you smell gas, open all windows. Evacuate the building if possible and report the leak to the Fire Department first, if possible, and then Building Management.
6. Clean up any dangerous spills.
7. Replace telephone receivers to restore communications. However, do not use telephones, except to reach Management Office or the Fire Department.
8. Listen to the radio for emergency reports.
9. DO NOT spread false rumors regarding the condition of the building or anything else that may cause panic.
10. Cooperate with Management personnel and Fire Department representatives.
11. Be prepared and stay alert for aftershocks.

Checklist for Business Survival following an Earthquake

Businesses face many hurdles in recovering from earthquakes. A key to survival is looking ahead and planning for recovery before an earthquake strikes. The following checklist identifies areas that can reduce the impact of an earthquake by enabling your company to continue normal business operations.

- ☐ Make agreements with vendors and suppliers to assure continued business or identify alternate sources in the event your normal vendors are unable to function after an earthquake.
- ☐ Develop and maintain inventories for critical supplies, equipment and employee skills.
- ☐ Develop a plan for informing clients, the general public and the media about company operations following an earthquake.
- ☐ Store duplicates of vital company records and important documents off-site.
- ☐ Take steps to “quake proof” your computer facility and equipment.
- ☐ Establish contracts with engineers and suppliers to survey damage and perform clean up following an earthquake.
- ☐ Develop a plan for business restoration including securing alternate work sites for personnel, restoring damaged utility systems, and controlling access to company facilities.
- ☐ Develop alternate marketing strategies for your products or for moving into other markets under post earthquake conditions.
- ☐ Create post-earthquake financing and investment strategies to protect corporate assets.
- ☐ Make sure your bank is informed about your disaster contingency planning to assure quick response to your post-earthquake needs.
- ☐ Review existing inter-company mutual aid agreements to establish what needs might be following an earthquake.

5. Designate a responsible person to do the following:
 - Wait at the building's main entrance for medical personnel. When they arrive, direct them to the injured person.
 - Whenever possible, have an elevator standing for the rescue team.

NOTE: CPR training and first aid courses are available through your local American Red Cross and are sometimes offered through the Management Office. All occupants are encouraged to participate.

BOMB THREATS

Bomb threats should always be taken seriously. Do not assume that a bomb threat is a prank call or that they are only made to the Management Office. Anyone can receive a bomb threat and all building occupants should be prepared.

Telephone Bomb Threats

1. The person receiving the call should try to get as much information as possible from the caller and should WRITE OUT THE MESSAGE EXACTLY AS RECEIVED FROM THE CALLER.
2. LISTEN CAREFULLY. You may be able to help authorities identify the caller, his location, or the location of the explosive by his comments, vocal characteristics and any background noise.
3. Keep the caller on the phone for as long as possible. Ask the caller to repeat the message.
4. Obtain as much information from the caller as possible such as location of bomb, time of detonation, appearance of bomb, and callers' reason for planting the bomb (please see the **Bomb Threat Questionnaire** found in section VII of this manual).
5. Remind the caller that the building is occupied and that the bomb might cause the deaths of innocent people.

OMNINET

Omninet Property Management, Inc.

Written Bomb Threats

Upon receipt of a written bomb threat:

1. Immediately notify the Management Office
2. Do not destroy the note
3. Do not let others handle the note
4. Turn the note over to building management or emergency personnel

Personal Receipt Of Bomb Threats

When a bomb threat is directed to a specific individual, he/she should immediately search his/her own workstation or office for unidentifiable or suspicious items. Please remember the following:

- Look for anything out of the ordinary or out of place.
- Look high and low – not just at eye level.
- Methodically search from one end of your work area to the other.

Searching Your Suite For A Suspected Bomb

Once a telephone or written bomb threat has been reported to the Management Office, occupants should search their suites for any suspicious packages.

Following are some search guidelines:

- Do not rely on random searches in logical places.
- Explosives are concealed most easily in areas that have the easiest access
- Be aware of out of the ordinary articles that are foreign to the area.
- The bomb is likely to be packaged in a common container such as a shoe box, cigar box, a book, a grocery bag, an athletic bag, and airline bag, a suitcase or briefcase.
- Anything that does not belong, such as a book in the restroom, should be considered a suspicious object.
- When searching individual rooms/offices, start at the outside walls and move towards the center of the room.

NOTE: If a suspicious object is found, **DO NOT TOUCH IT**. Report the finding immediately to your designated emergency personnel and to building management.

Suspicious Packages

Upon the delivery of all packages always be aware and:

- Do not accept the contents of any container as bona fide simply because it was delivered in a routine manner.

- Do not assume that container marking and/or appearance is sole evidence of its content, identification or legitimacy.
- Be aware of packages with incorrect titles or those marked "Confidential" or "Personal".
- Do not open any suspicious package. Do not cut any cord, rope or wire on a suspicious package.

Be aware of the following signs that a package may include a bomb:

- Excessive postage
- No return address
- Excessive weight
- Incorrect titles
- Restrictive markings (such as "Confidential" or "Personal")
- Oily stains or discoloration

Upon Receipt Of A Suspicious Package

1. Do not allow anyone to handle the package.
2. Immediately call the Management Office

SUSPECTED BOMB SAFETY PRECAUTIONS

The following safety precautions will acquaint all occupants with the dangers inherent in a bomb threat, bomb search, discovery and handling of all suspected bombs, or if you have any other reason to suspect a bomb is in the building.

While some of the precautions may seem elementary, do not dismiss them as unimportant. Adequate knowledge of these precautions may save your life as well as the lives of other persons working in or visiting the building.

1. If it is suspected that a bomb is in the building:
 - Do not use radio equipment to transmit messages
 - Do not change lighting conditions
 - Remove all flammables
2. Please make only necessary phone calls. Open phone lines are essential to effectively controlling the emergency.
3. If a suspected bomb is identified:
 - Do not touch it

- Do not attempt to move or carry it
 - Remove all flammable from the area
4. During a bomb threat emergency, cooperate with all fire department instructions, including building evacuation.

EVACUATION

In the event of an emergency, it may become necessary to evacuate the office building. All personnel should be completely familiar with the following evacuation procedures.

- In an emergency situation, wait until management personnel indicated that it is safe and appropriate to evacuate the building.
- If you are directed to evacuate, closely follow the instructions provided.
- Do not exit via the elevators.
- Familiarize yourself with the location of all stairwell exits; in the event a stairwell is blocked, proceed to an alternate stairwell.
- Use safe stairwell exit procedures including:
 - Remain calm and quiet
 - Remove high heeled shoes
 - Exit in a single file and keep to the right using hand rails
 - Move quickly, but do not run
 - Assist those who may have trouble on the stairs or who have been injured
 - Treat injuries on stairwell landings only and only when safe to do so

Evacuating the Injured

If you are alone with an injured person who is unable to leave the area unassisted, you may find that a "blanket drag" will provide you with the means to remove the person from the hazardous area. The drag can also be accomplished with a coat. If you are unable to carry the person, the "blanket drag" may be your only means of moving the person out of danger.

To get the person onto the blanket, turn the person on his/her side and roll the blanket up, lengthwise, so that when you roll them over to the other side, you can open the blanket. Grasp the corners nearest the head of the injured and pull the person out of the area.

CIVIL DISTURBANCES

Although riots and civil disturbances are rare, there is still a need for a planned course of action in the event a civil disturbance erupts. Should a disturbance start outside the building, the Management Office will:

- Secure all building entrances.
- Notify the police.
- Notify the tenants.
- Prevent access to all suites.

In the event that a civil disturbance initiates inside the building:

- Make sure all occupants are in your office and lock your suite doors including the main entrance. Assign a responsible individual to stand by the entrance door with a key allowing authorized personnel only to enter and leave.
- Immediately notify the Management Office and provide the following information:
 - Exact location of the disturbance, demonstrators and/or rioters
 - Approximate number of demonstrators or rioters
 - Your name, company name and call back number

POWER FAILURE

In the event of a power failure Southwest Corporate Center is equipped with emergency systems which will provide power for emergency lighting, selected elevator service, life and safety security systems and water for the restrooms.

If you experience loss of power in your suite, immediately contact the Management Office. An engineer will be dispatched to assist in restoring power, If the entire building is affected, the Electric Utility Company will be contacted for assistance and building personnel will keep all tenants advised.

If the power failure occurs during daylight hours, open the blinds to utilize available sunlight. This should be avoided, however, in emergency situations where procedures call for closed blinds.

Following is a list of items that all tenants should keep on hand in case an emergency of any kind causes the loss of power:

- ❑ **Emergency Lighting** – flashlights, flares, light sticks.
- ❑ **Batteries** – keep a fresh supply
- ❑ **Blankets** – lightweight fire and shock retardant emergency blankets.
- ❑ **Radios** – portable transistor radios with extra batteries and two-way radios
